TECHNICAL PORCELAIN

800X3000mm | 800X2600mm
800X2400mm | 1200X1800mm

SOMANY

BIG IN SIZE
BIGGER IN STYLE

Inspired by the soul of natural stone, Coverstone blends timeless elegance with modern versatility. Its large-format slabs unfold like sweeping canvases, expressive and brimming with possibilities, representing the pinnacle of creativity through cutting-edge design and exceptional scale. True to its essence, Coverstone features rich textures, vibrant colours, and exclusive designs that faithfully replicate nature's wonders. Guided by the ethos of 'Think Beyond', Coverstone becomes a canvas for unbounded expression — where nature's rhythm meets human imagination. More than just a surface, it's a smarter choice, a bold evolution in design and a new chapter in the future of surface innovation. From residential sanctuaries to commercial landmarks, Coverstone redefines possibility, offering the beauty of natural stone with the freedom to dream bigger, build bolder.

PRODUCT RANGE

TECHNICAL PORCELAIN — STELLA · LEIA · NEBULA · ALESSIA · LITH

CONTEMPORARY SURFACES — QUILLTOUCH · SHAPEtech · carvo

LUXURY POLISH — LUX COLLECTION

COVERSTONE

Video

The COVERSTONE range from SOMANY is powered by cutting-edge FCS technology. It offers a 15mm thickness in both full body and coloured body options, with slab sizes starting from 800x2400mm and beyond. With limitless possibilities, COVERSTONE enhances your spaces with luxurious surfaces. COVERSTONE is not only smooth and radiant but also easy to clean, hygienic, non-porous, scratch-resistant, fire-resistant, and impact-resistant. With its impressive qualities, COVERSTONE is sure to captivate and inspire, making it an ideal choice for elevating your living spaces—whether it's a worktop, kitchen top, walls, floors, or your bath space.

OUR TECHNOLOGY

FCS TECHNOLOGY
FRITTAGE COMPACT SLABS

Our (FCS) Frittage Compact slabs achieve outstanding surface and body properties through a meticulous process involving exposure of unique raw materials to high temperatures, reconfiguring the atomic structure for a dense, tough, and non-porous surface. Central to our operation is the CONTINUA+ integrated plant, utilizing continuous compaction techniques with unique sequencing processes on the conveyor belt. This innovative approach ensures consistent thickness, unparalleled density distribution, reducing porosity while enhancing the surface aesthetics with higher brightness, design clarity, increasing abrasion resistance while reducing energy consumption, and minimising carbon footprint.

FOSTERING HEALTH AND HYGIENE

In response to evolving lifestyles, prioritising health and hygiene in living spaces has become essential. Somany, with its advanced FCS Technology, ensures a cleaner environment by inhibiting the growth of harmful microorganisms on tile surfaces.

FEATURES

- HYGIENIC & SAFE FOR CONTACT WITH FOOD
- EASY TO CLEAN
- IMPACT RESISTANT
- STAIN RESISTANT
- FLATNESS & STABILITY OVER TIME
- SCRATCH PROOF & ABRASION RESISTANT
- BEND RESISTANT
- LOW WATER ABSORPTION
- EASY INSTALLATION
- FIRE RESISTANT
- FROST RESISTANT
- LONG DURABILITY
- HEAT RESISTANT
- CRAZING RESISTANT

Connecting the Dots with Stone Flakes in Vibrant Metallic Colours

800X3000mm | 800X2600mm

In the ever-shifting tapestry of our world, some elements and materials carry within them a profound story of time, persistence, and transformation. STELLA celebrates this journey—a remarkable, granular wonder that connects us to the dots of sand through a variety of stone flakes in vibrant, transparent, and metallic colours. Among these, the striking amalgamation of vivid flakes stands as a testament to the beauty of nature's intricate dance.

Obtuse Particles Arranged in a Harmonious Melancholy

800X2600mm | 800X2400mm

NEBULA is a crystalline masterpiece that emerges from the depths of our planet, inspired by the granularity of sand, salt, and obtuse particles arranged in harmonious melancholy. Available in different body types and colour granules, NEBULA is a testament to the beauty of simplicity, with tiny crystal granules creating a mystic charm.

Precise Granular Arrangement with Multiple Colour Flakes

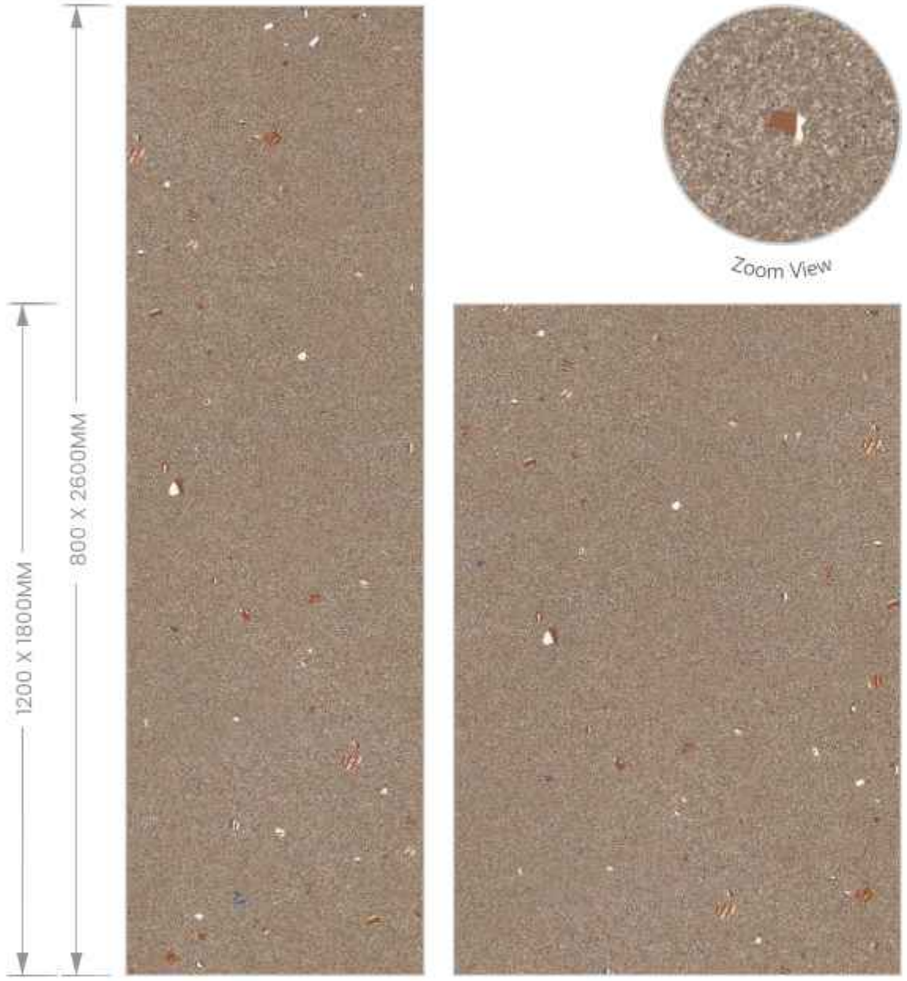

800X2600mm | 1200X1800mm

In a world where we constantly seek complexity and novelty, LEIA emerges as the result of an orderly and precise granular arrangement with multiple colour flakes. Its elegance, in its most basic form, reminds us of the inherent beauty found in the fundamental elements of our universe. It embodies the idea that even the most uncomplicated elements can hold astonishing depth, intrigue, and significance.

Salt & Pepper Designs in Super White Body

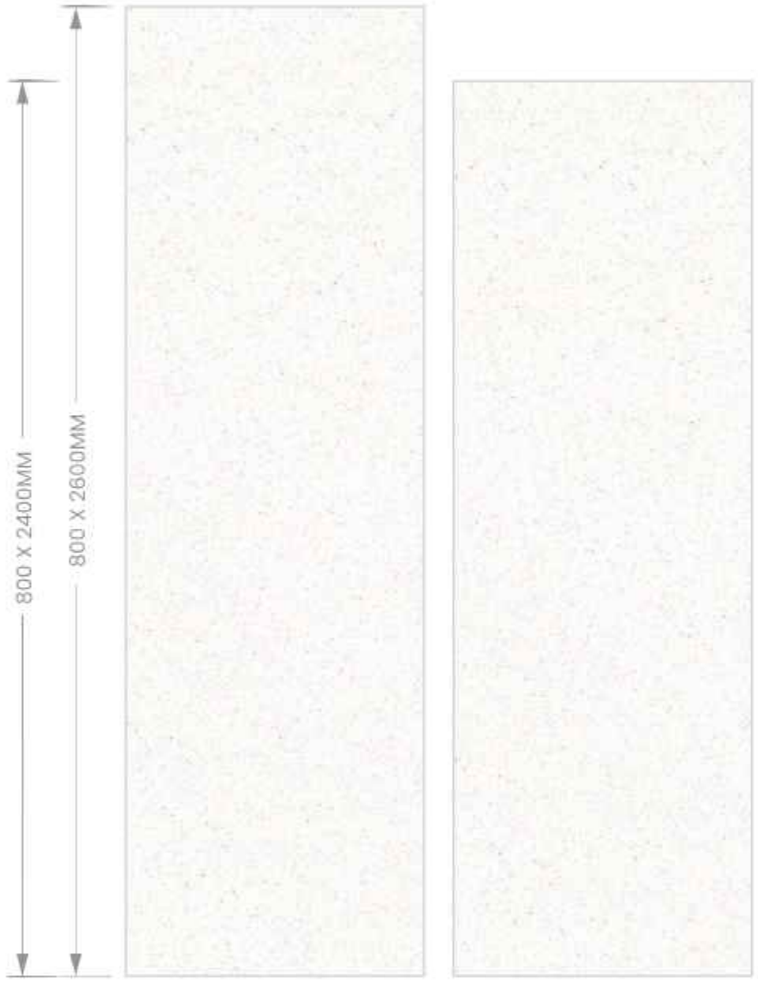

800X2600mm | 800X2400mm | 1200X1800mm

ALESSIA is an epitome of white purity, with a salt and pepper design ingrained. White body is a minimalist yet striking aesthetic choice that blends modernity with simplicity.
This design approach incorporates subtle speckles of salt and pepper against a pristine white backdrop. The contrast between the light base and darker accents creates a visually appealing texture, adding depth and character.

Coloured Body in Single Colour

800X3000mm | 800X2600mm | 800X2400mm

The LITH collection consists of colour body slabs in single flat colours, offering a cohesive and versatile solution for diverse interior design applications. These slabs are crafted with a uniform colour throughout their entire body, ensuring consistency and durability in both appearance and performance. With a wide range of design possibilities, LITH caters to styles from minimalist to bold and vibrant.

TRANSPORTATION, HANDLING & STORAGE:

To ensure minimal or no storage hassles afterwards, make sure to secure the slabs properly during transportation. If the distance is shorter, keep them in a vertical position supported by a packing material to avoid rubbing or breakage. If the distance is more, ensure to place them on an A-shaped frame to avoid breakage or abrasion in transit.

Scan for
Laying Instruction Video

MANUAL HANDLING:

Using the regular suction cup shown here, workers can shift the slabs without much hassle. Also, if the slab has a textured surface, it is advisable to use large large-format slab Carrier System as shown here to lift it manually while securing it with suction cups from the four sides. This ensures easy manual handling without any damage or breakage while moving or shifting the slabs.

LAYING AND FIXING:

1. These slabs are heavy, large-sized slabs with sharp edges; thus, it is imperative for people handling them to wear protective gear while handling or during transportation. For the safety of the operator, it is advisable to use double or triple suction cups. Ensure a tight grip of the slab and also clean it thoroughly before transportation.

2. While laying the slabs, please check to
-Prepare the subfloor or the laying surface before placing the slab. It should be rigid, non-flexible, and strong enough to support the load of the slabs.
-Provide proper curing for the subfloor for at least 24 to 48 hours before slab work.

3. Use appropriate cement-based, fibre-reinforced, or ready-mixed adhesive to ensure proper fixing.

4. Using a 10x10 square notch trowel, spread the adhesive evenly, and 5cm to 10cm more than the size of the slab. To ensure no bubble of air pockets, apply the adhesive in stripes in parallel motion with the short edge.

5. Owing to the large size of slabs, a layer of adhesive should be applied at the back of the slabs using a trowel as shown here and should be fixed on a handing frame using a suction cup in a vertical position.

SLAB CUTTING:

Using a pencil, mark the portion to be cut from both sides. Place the cutting guide with the cutting carriage in a way that it correspondence with the markings on the slab. Lock the cutting and, with the suction cups, guide the cutting carriage. Watch your pressure and movement on the cutting carriage as it has to be constant to ensure correct scoring.

Score one end of the slab by 15mm while moving the cutting carriage towards the edge of the slab. Do the same on the opposite side.

6. A 10x10mm square notch trowel should be used for applying adhesive on the laying surface, while a 5x5mm trowel should be used to apply adhesive at the back.

7. The vertically erected slabs on the handling frame should then be lowered horizontally and carefully and firmly pressed into adhesive using a surface vibrator or a rubber mallet.

8. Use a levelling system for a lippage-free and evenly smooth surface.

9. To fix the slab nearer to each other or to shift the slab slightly up and down while fixing, you can use a closer system.

10. To ensure full contact between the adhesive and slab surface, check the backside of the slabs regularly. The hollow sound means it needs to be re-fixed with extra adhesive to smooth that particular area.

11. After the slab work, cover that area protection sheet till all the civil work is completed, and then take up grouting work last.

TOOLS IDEAL FOR MAX:

NOTCH TROWEL

LEVELLING SYSTEM WITH PLIER

TILE / SLAB LIFTER

SUCTION CUPS

TILES / SLAB CLOSER SYSTEM

SURFACE VIBRATOR

CLEANING:

After laying the slab, ensure proper cleaning to remove any residual grouting or dirt accumulation. You can use a cementitious de-scaler as it is mildly acidic and does not emit chemical fumes. In case of epoxy or resinous grouting, use the recommended detergent or slab cleaner.

Maintenance:

For normal cleaning, natural detergent with high cleaning powder is an ideal solution. In cases of rigid dirt accumulation over the period, you can use either of the below to clean it;

Dirt Type	Product
Cement, Metal Tracer, Rust	Cementitious Descaler
Residuals, Stains and halos of Epoxy	Epoxy Descaler
Grace, Tyre Marks, Colors, Markers	Non-Soap Degrease
Graffitis	Acetone and anti-graffitis

-After the grouting and removal of excess grouting, do not clean before ensuring complete drying of the slab surface, which is generally 5 days.

-Newly laid surface should not come in contact with any water or moisture as adhesive and grouting materials are maturing and hardening at this time. This is quite important outdoors, where there is a risk of freezing.

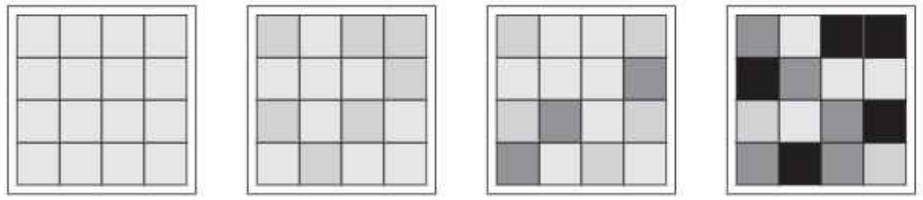

-Also protect your slab surface against mechanical or chemical hazards posed due to other kinds of civil works or installations. Ideally, it should be covered with thick cardboard or similar material.

-The final cleaning of the surface should be done with products having chemical resistance against tiles. Abrasive products or products with hydrofluoric acid should be avoided as they alter the glaze property of the slab and pose an irreversible risk to slab.

DESIGN, PATTERN & SHADE VARIATION GUIDE

Current development efforts have made ceramic tiles resemble and look authentically like natural materials (Stone, Wood, Fabric).

Recognising this situation, it is necessary to be informed of the grade of design & pattern variation that is expected from these products. As a general guide, the design & pattern guide given below classifies the range according to the degree of variation.

V1 Minimal Variation **V2** Slight Variation **V3** Moderate Variation **V4** Substantial Variation

The classification is as follows:

V1 Minimal Variation V2 Slight Variation V3 Moderate Variation V4 Substantial Variation

vi) Surface Quality	Min. 95% of Surface will be free from Visible Defects	Min. 95% of Surface will be free from Visible Defects	Min. 95% of Surface will be free from Visible Defects	
B) Physical Properties				
i) Water Absorption	Average ≤ 0.08%, Individual Max. 0.1%	Av ≤ 0.5%, Individual 0.6%Max	< 0.08%, Individual Max. 0.1%	IS 13630 Part 2/ISO 10545-3
ii) Modulus of Rupture [N/mm2]	Avr 35, Individual 32 Min	Avr 35, Individual 32 Min	Avr >35, Individual 32 Min	IS 13630 Part 2/ISO 10545-4
iii) Breaking Strength in N	1300	Min 1300	> 8000 N	
iv) Moisture Expansion in mm/m	0.02	Test Method Available	0.02	IS 13630 Part 3/ISO 10545-10
v) Scratch Hardness of Surface (Mohs)	Min 5	N.A	Min 5 Matt & Min 4 Polished	IS 13630 Part 13
vi) Coefficient of Liner Thermal Expansion From Ambient Temperature to 100° C	6 X 10-6 K-1 Max	Test Method Available	Max 6 X 10^{-6} K^{-1} Max	IS 13630 Part 4/ISO 10545-8
vii) Thermal Resistant	10 Cycle Min	Required	10 Cycle Passed	IS 13630 Part 5/ISO 10545-9
viii) Crazing Resistant	4 Cycle @ 7.5 bar Min	N.A	N.A	IS 13630 Part 9/ISO 10545-11
ix) Impact Resistant as Coefficient of Restitution (COR)	0.55 Min	Test Method Available	0.55 Min	IS 13630 Part 14/ISO 10545-5
x) Deep Abrasion Resistant [in mm3]	140,Max	Max.175	Max.140	IS 13630 Part 12/ISO 10554-6
xi) Frost Resistant	Required	Required	100 Cycle Passed	IS 13630 Part 10/ISO 10545-12
C) Stain & Chemical Resistant (Un Glazed)				
i) Stain Resistant	Min Class 2	Manufacturer to State The Class	Min Class 5 (Matt), Class-3 (Polished)	IS 13630 Part 7/ISO 10545-14
ii) Resistant to Household Chemicals	Min Class AA	Min Class UB	Class UA	IS 13630 Part 7/ISO 10545-13
iii) Resistant to Acids and Alkalis (With Exception of Hydrofluoric Acid and its Compounds)	Required if Agreed	Test Method Available	Class ULA (Low Conc) Class UHA (High Conc)	

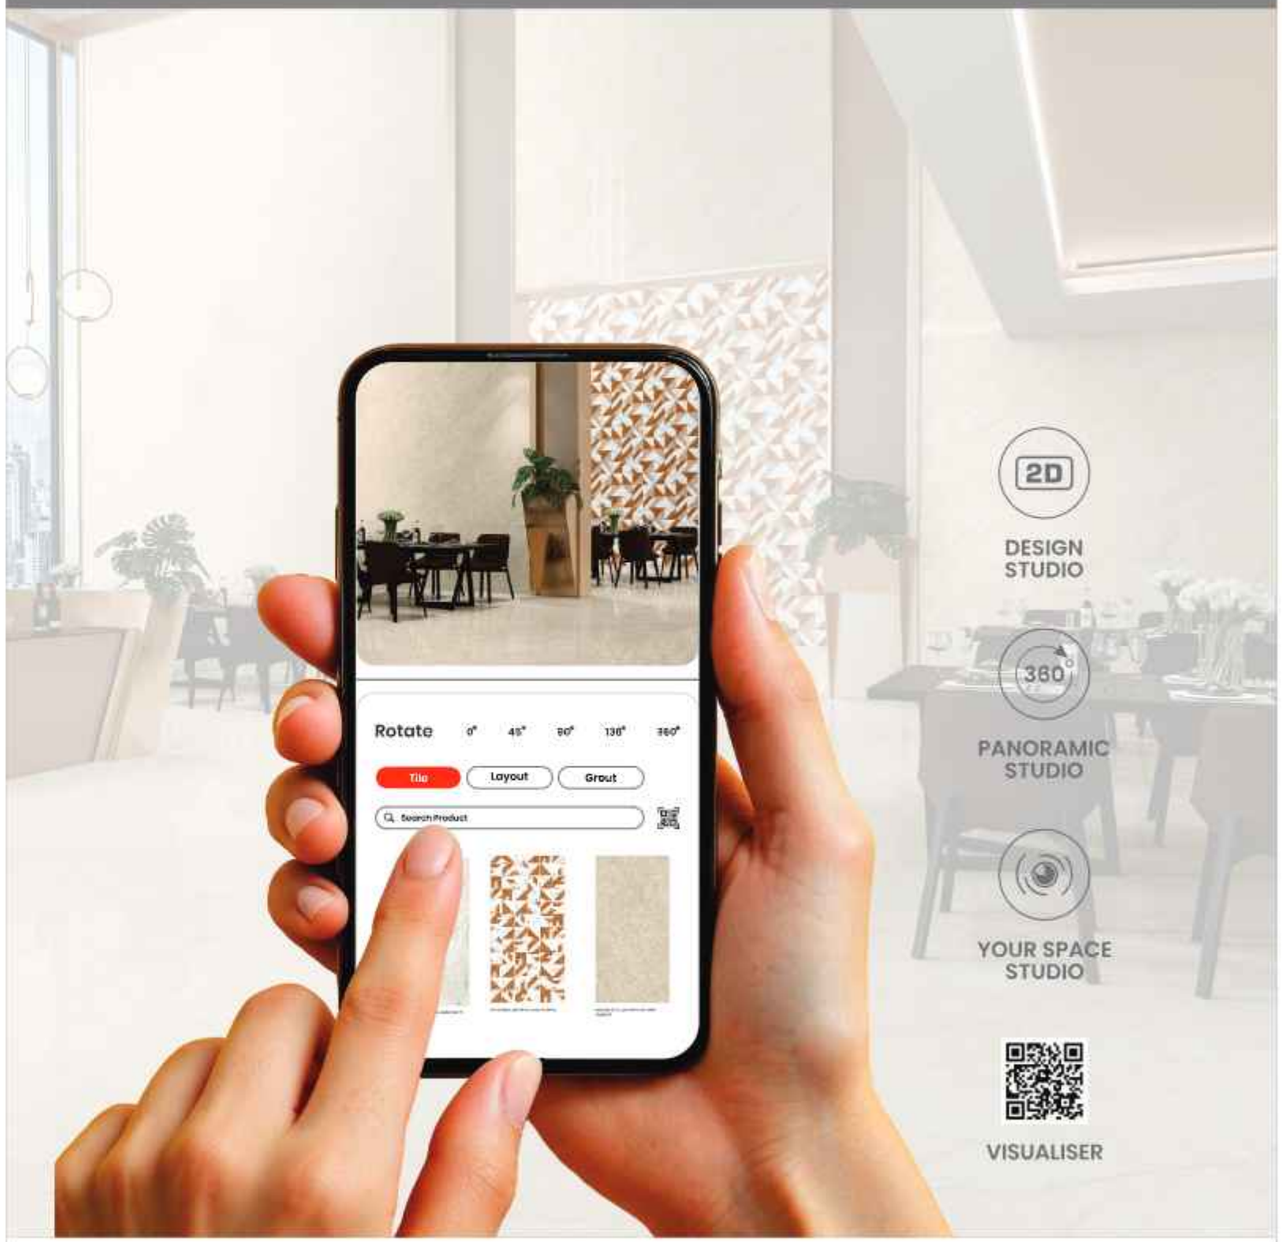

The tiles in this catalogue are reproduced using four-colour printing, and the tiles may not be displayed in accurate sizes. Therefore, we strongly recommend customers to check the physical samples before placing an order. The "Technical Specification" applies exclusively to premium-quality Somany wall and floor tiles. Please inspect the tiles thoroughly before installation, as we don't accept any complaints once the tiles have been applied or fixed. Additionally, complaints regarding borders, highlighters, or motifs will not be entertained after purchase.

TILE VISUALISER

SOMANY

Choosing the perfect tile for your dream home should be exciting, not overwhelming! With endless styles, colours, and finishes to explore, how do you ensure your choice truly brings your vision to life? That's where our Tile Visualiser transforms the experience. From the **intuitive 2D Studio Visualiser to the immersive Panoramic-Studio Visualiser,** and even the AI-powered Your-Space-Studio Visualiser, you get a seamless, real-world preview of your selections. Instantly see how different tiles look in your space and make confident design decisions—because what you see is exactly what you'll get.

Your dream tile? Just a click away.

SOMANY Ezy Fix

Tile Adhesive | Epoxy Grout | Cement Polymer Grout | PU Adhesive | Grout Admix | Tile Cleaner

Lasting Bonds Made Ezy

Behind Every Stunning Tile, there's a Stronger Bond!
Experience the power of reliable tiling with Somany Ezy Fix. From ceramic and porcelain tiles to natural stone and marble, our adhesives work on all surfaces – walls, floors, indoors, outdoors, and facades. Available in cement-based and PU-based options, they offer strong adhesion across all sizes and materials. Complementing this, our cement and epoxy grouts ensure tight, durable joints that last. No matter the project, Somany Ezy Fix delivers a bond that's built to last.
