# HOME GUARD

---

Somany Ceramics, with its strong R&D team, has recently unveiled a collection of Germ Shield Tiles, featuring a special nano chemical coating that inhibits the growth of germs, bacteria, fungus and other microbes that it comes in contact with. The intrinsic properties of these tiles make them a perfect fit for both intimate spaces inside a home or public spaces and buildings. The tiles are available in four colourways: Perla, Moka, Beige and Olive Light. ([somanyceramics.com](http://somanyceramics.com))
